### **NEW SAME DAY VIDEO/EDIT SERVICE FROM SKS**

**To meet the ever-increasing demand for online video, SKS is delighted to offer a new shoot/edit one-day package. It's fast and it's cost-effective.**

If you'd like to capture good sound bites and great images, but have a tight budget and timescale, our new team of multi-skilled crews will do it all for you - shooting and editing on location.

You can view and approve the content right on site and we'll provide you with a DVD of the clips or images in a format of your choice. We can also upload and host your video for quick and easy downloading or upload to any other website. We'll then archive your content safely and securely for any future use.

Cost is **£650** per day for a multi-skilled, professional cameraperson/director/editor + assistant; professional digital camera, clip mic and lighting equipment + laptop for simple, straightforward editing (cost excludes travel expenses, uploading, archiving and VAT @ 20%).

Shooting costs (without the editing) range from **£500** per day, depending on lenses, lighting and set up requirements.

**This new service is an extra to our more sophisticated writing/shooting/editing/graphics services for long form or larger budget productions. It goes without saying that our customer service, attention to detail and quality apply right across the board.**

**If you'd like more details or to book a crew  
please call Sheila or Natalie on
